*Ensures the Authenticity of AIR Applications from Global Developers*

## **TC TrustCenter Issuing On-Demand Digital Certificates for Adobe AIR Applications**

**Hamburg, – Oct.7, 2008** – TC TrustCenter, the leading provider of on-demand digital certificate management services, today announced that it is issuing digital certificates for applications built on Adobe® AIR™ software to ensure users that these innovative applications can be globally trusted and are safe to use.

Adobe AIR offers companies a new way to engage customers with branded, rich Internet applications outside of the browser without requiring changes to existing technology, people, or processes. AIR applications are built using proven Web technologies and can be deployed across all major operating systems. Adobe AIR helps ensure safe installations by requiring digital signatures on each AIR application that identify the application and its creator before installation. According to Adobe, there have been more than 25 million installations of applications deployed on Adobe AIR in the first six months since its release.

TC TrustCenter thoroughly vets AIR developers globally and, once it is confident that they can be trusted, issues them digital certificates. Digitally signing AIR applications with a certificate issued by a recognized commercial certificate authority, such as TC TrustCenter, provides significant assurance to users that the application they are installing has not been accidentally or maliciously altered and identifies the signer (publisher). Adobe AIR displays the publisher name during installation when the AIR application has been signed with a trusted certificate. TC TrustCenter adds additional value by providing high-quality support for its certificates.

“TC TrustCenter a company of ChosenSecurity is part of the Adobe Certified Document Services network and a valued partner,” said Luis Polanco, senior product manager for Adobe AIR at Adobe. “We are excited that TC TrustCenter has further expanded its Adobe support and is now issuing code signing certificates for Adobe AIR.”

“TC TrustCenter is pleased to expand our relationship with Adobe”, said Steve Pace, senior vice president of worldwide operations of TC TrustCenters Holding ChosenSecurity Inc. “TC TrustCenter has extensive experience with application and code signing through our relationships with Symbian and other vendors. We are emerging as a leader in global signing because of our track record of success, our unique delivery model, and the economics we can pass along to the end user.”

AIR application certificates are available to purchase for developers around the world at [http://www.trustcenter.de/products/tc\\_publisher\\_id\\_for\\_adobe\\_air.htm](http://www.trustcenter.de/products/tc_publisher_id_for_adobe_air.htm).
