

AxiCom PR, TC TrustCenter No. 01/09, February 2009

Hamburg-based On Demand Digital Identity specialist presents CeBIT news at Aladdin booth (Hall 11 / Stand # B38)

TC TrustCenter at CeBIT: Magic Multi-functional ID Ensures Unlimited Mobility

Hamburg, February 13th, 2009 – At CeBIT in Hanover (March 3-8, 2009) TC TrustCenter will present its solutions at the stand of its partner Aladdin (Hall 11 / Stand # B38). This year's CeBIT presentation focuses on the many possibilities of using digital identities to create a modern and mobile IT working environment. Together with Aladdin, TC TrustCenter will introduce a new integrated solution that enables the easy, efficient and cost-effective creation of future-proof remote access based on the usage of a multi-functional ID.

From system logon, email signature and encryption to strong authentication at Web service portals, from the authorization of electronic transactions to the signing of documents e.g. in PDF format – digital identities offer an integrated and convenient support of the typical IT based every-day business tasks and without constantly having to revert to isolated applications. Introducing a new integrated solution that was developed in cooperation with Aladdin, TC TrustCenter will show at CeBIT the benefits of a digital identity which copes with complex requirements for modern IT workplaces both efficiently and cost-effectively.

At the stand, interested visitors will also get comprehensive information about other TC TrustCenter core solution areas, such as Secure E-Mail, E-invoicing, Document Signing, Device Authentication or Mobile Code Signing.

Note for editors:

For scheduling appointments for background interviews with the TC TrustCenter experts at CeBIT 2009 please contact Anne Klein, AxiCom Cohn&Wolfe (email: anne.klein@axicom.de, phone: +49 89-800 908 23).
